## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stone et al. (US 6,561,820) in view of Korsunsky (US 6,309,254)

Stone et al. discloses a basis grid array signal conducting arrangement grid array [figures 4-6] that applicant has claimed except for a different spacing between conductor pairs.

Korsunsky [figure 6] teaches a spacing between signal conductor pairs will result in noise reduction.

It would have been obvious to one having ordinary skill in the art at the time invention was made to modify the connector pairs of Stone et al. to provide the spacing as taught by Korsunsky in order to reduce the cross talk effect.
